

Sorry for the long pause in updates, not much had changed with assessments since the last update on 9/28/2018. There is still one authorization letter working through the system for the Natchez fire as mentioned in my last update. All other requests have been authorized.

The BAER teams on the Taylor and Klondike Fires on the Rogue River-Siskiyou NF and the Crescent Mountain and McLeod Fires on the Okanogan-Wenatchee NF will be wrapping up this week and submitting requests by early next week. The request for the Maple Fire on the Olympic NF should be coming in this week as well. The final BAER team for R6 this season started today for the Terwilliger fire on the Willamette NF. They are hoping to have their request submitted to the Regional Office by early next week as well. I will send more information on the requests as they become more solidified this week.

No fires are anticipated to have a request that will need to be sent to the Washington Office, all will be within Regional Forester authority.

Let me know if you have any questions.

Subject: R6 BAER Update 9/28/2018

Good afternoon,

Things are still going well with BAER assessments and close coordination with the teams and forests on requests has made for an easy authorization process. There are currently 6 authorization letters working through the correspondence system with a 7th to be entered in this afternoon for the Natchez Fire.

Natchez Fire, Rogue River-Siskiyou - This request was submitted today for \$33,627. Treatments include road drainage improvements, invasive plants early detection-rapid response, and hazard warning signs.
